Workshop invitation

Monday, 21 March 2016, 13:30-15:30

Introduction to the new Web of Science™ (1 hour)
and InCites Journal Highly Cited Data (1 hour)

Regardless of whether you are using the Thomson Reuters **Web of Science™** and **Journal Highly Cited Data** for the first time or you are an advanced user, we would like to offer you a hands-on workshop to facilitate your work with the platform.

The aim of this workshop is to show with practical examples how to use **Web of Science™ Web of Science™** and **Journal Highly Cited Data** to search, analyze, and share the most relevant information in science, social science, arts and humanities, discover emerging trends to inform your research and identify collaborators with influence using citation analysis.

This is an **interactive workshop** and participants are encouraged to **input questions** they have regarding to systematic literature retrieval and citation analysis at their institutions and the group will discuss how **Web of Science™** and **Journal Highly Cited Data** can be used to provide a solution. We will also discuss the range of **citation metrics** and **journal ranking indicators** available and how they are produced.

Web of Science™
